

Abstract Classes vs. Interfaces

 Abstract Class (abstract class)	
FEATURE	ABILITIES & RESTRICTIONS
Inheritance	Single class inheritance only
Fields & State	Full instance fields & constants
Constructors	Allowed (used via base chaining)
Access Modifiers	public, protected, private, internal
Method Types	Abstract, virtual, or fully concrete
Core Purpose	Code sharing & identity hierarchy

 Interface (interface)	
FEATURE	ABILITIES & RESTRICTIONS
Inheritance	Multiple implementation allowed
Fields & State	No instance fields (Properties only)
Constructors	Forbidden (No instance constructors)
Access Modifiers	Public by default (Explicit in C# 8+)
Method Types	Contracts (Default impl allowed C# 8+)
Core Purpose	Behavioral contracts & decoupling
